Projects

CareerGenie — AI-Powered Career Platform

- Developed a full-stack career platform with student registration/login, profile management, job recommendations and application tracking
- Built resume upload and AI-assisted resume analysis with ATS scoring and improvement suggestions
- Implemented student, recruiter and admin workflows with REST APIs and MongoDB-backed data management

TaskFlow AI

- Developed an AI-assisted task and productivity application focused on organizing and managing tasks
- Designed a responsive interface with reusable components and integrated full-stack application functionality

Personal Portfolio — Full-Stack Portfolio

- Built a responsive modern portfolio showcasing projects, skills, experience and certifications
- Created backend APIs and MongoDB integration for dynamic project and contact data
- Implemented admin authentication and protected project-management operations

Password Strength Checker

- Built a client-side password strength checker using JavaScript to evaluate password strength and provide immediate feedback
